Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Ex. Norris and Mr. Lee agreed that the standing rejection of the claims in light of Smith was improper and has thus been removed. However, Norris expressed concerns about Klein and the instant claims. Norris suggested adding process limitations into the claim to further define the structure. Mr. Lee did not feel that such a modification was unwarranted and expressly was against importing process limitations into the claims. Norris stated that his feeling was that the solder in Klien corresponded to the instantly claimed "solder bonding structures". Mr. Lee, however, felt that the solder in Klien would lose the structure Norris alleged it contains once the connection was made. Norris still insisted that the structure in Klien was sufficient to meet the connections claimed instantly..
